Getting Started with the AWS Free Tier

Clayton Sewell

Getting Started With AWS

Setting up my AWS account took 10 minutes. AWS asks for your credit card details only for confirmation you are a human.

The first project I'm working on is The Cloud Beginner Challenge with NextWork. I'll do the first project on Saturday, 27 September 2025. I'll make time for doing projects by using a Pomodoro timer to stay focused during each block.

Try AWS at no cost for up to 6 months

Start with USD \$100 in AWS credits, plus earn up to USD \$100 by completing various activities.

Sign up for AWS

Root user email address
Used for account recovery and as described in the [AWS Privacy Notice](#)

AWS account name
Choose a name for your account. You can change this name in your account settings after you sign up.

Verify email address

OR

[Sign in to an existing AWS account](#)

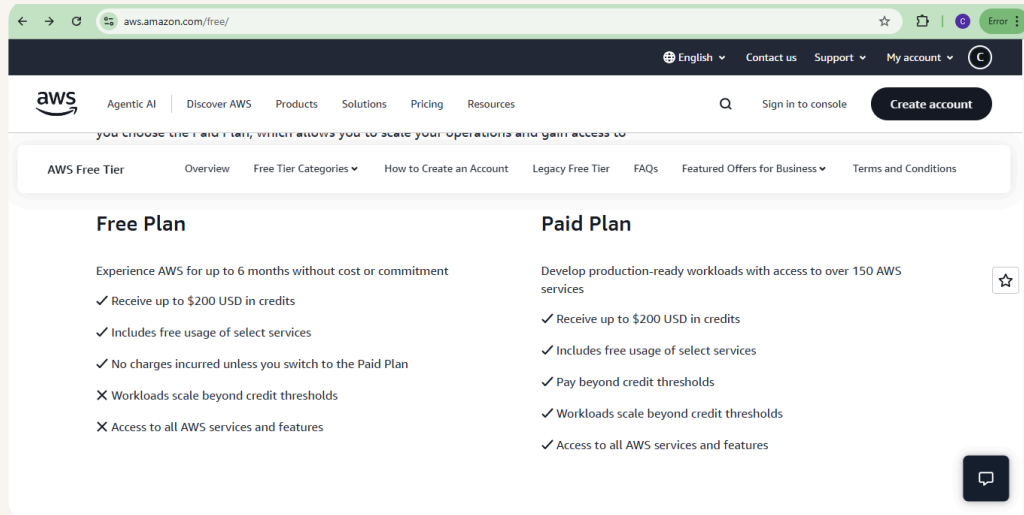

AWS Free Tier

When you sign up, you automatically get access to AWS, which allows users to try it for free by providing \$100 USD in AWS credits! For 6 months after signing up or until your credits run out.

The AWS Free Tier includes three different types of free offers. Receive up to \$200 USD in credits, Includes free usage of select services, No charges incurred unless you switch to the Paid Plan.

After my 12-month Free Tier period ends, I'll still have access to all AWS services, but billed at standard rates. I'll stop getting free access to time-limited Free Tier allowances. To make sure I remember this date, I will add a reminder.

Excited to share my progress! Let's connect.
